

What is Oeko-Tex Standard 100?

The Oeko-Tex Association, groups of independent testing institutes, developed and perform tests based on uniform standards for harmful substances on textiles worldwide.

Oeko-Tex Standard 100 focuses on the effects of textiles on the health and well being of the consumer.

MW's Oeko-Tex 100 Certification

We have certified our window covering fabrics made of 100% polyester - yarn dyed/piece dyed, in all shades, with roller, roman, vertical and pleated finishes.

You can find our certification on our website – www.mwcanada.com

Shortlist of Substances Tested

- Hanna Andersson: *fabrics in clothing line*
- Gildan: *imprinted activewear*
- Steelcase: *the innovative Leap chair*

What does Oeko-Tex certification mean to you and your customer?

After a spate of hazardous goods made their way to market, there have been increasing calls by consumers for proof that the goods they're buying are safe. Oeko-Tex Standard 100 certification of MW Canada's product gives your customers the knowledge that they are purchasing textiles that have been tested and found safe for use *by an independent organization.*

Certification means our textiles have passed testing based on more than 100 health related parameters.

Providing these textiles to your consumer will demonstrate your commitment to customer safety, leading to increased market share.

"Confidence in Textiles", states Oeko-Tex's label. We're sure you will agree.
